STEEL BUILDINGS

Quality Steel Building Systems That Work

Welcome

TORO Steel Buildings is a leading supplier of prefabricated steel building systems. Any size - any application.

We provide both consumers and contractors with pre-engineered building solutions that are fast, efficient and affordable. We pride ourselves in always being able to deliver the building that will work exactly for our customer.

Green Building Commitment

TORO Steel Buildings is committed to supporting the advancement of environmentally-friendly, or green, structural solutions. Prefabricated steel buildings are not only thermal and energy efficient but steel is North America's number one most recycled material, making TORO Steel Buildings a very eco-conscious choice.

TORO Promises you the Experts in Steel Buildings

About the Experts...

Project Management Made Easy

You only want to explain it once so we know how important it is for you to connect with the right person the first time. Our steel building specialists take the time to pay attention to your details, making sure you have everything you need for a successful construction project:

- Summary
- Quotation
- Drawings
- Structural modification and enhancements
- Options, colors and accessories
- Custom site integrations
- Delivery schedule
- Required safety factors

TORO has a thorough understanding of industry-specific structural requirements and expertise in total project management, from the design and RFQ response protocol through to the details of site delivery. Many pre-engineered projects have been awarded to TORO because of project knowledge and the relevant expertise of our team.

About the Steel Buildings...

Sturdy Pre-engineered Buildings for All Uses

From a basic backyard storage shed to a complex commercial steel building project, we have the design to delivery expertise to ensure that your new building comes in on-time, and on budget. The engineering and service team at TORO Steel Buildings is committed to saving you time and money by providing you with the best-quality steel building – at the best possible price.

- Storage
- Garages
- Maintenance & Repair Shops
- Agricultural Buildings & Barns
- Livestock Facilities
- Offices
- Community & Recreational
- Warehouse & Distribution
- Schools & Churches
- Aviation / Hangars
- Commercial & Retail
- Manufacturing / Industrial

Garages and Service Shops

Benefits:

- Flexible design for many functions
- Non-combustible
- Choice of colors for aesthetics
- Long term durability and security

Whether it is to protect a single vehicle or to provide a maintenance depot for a fleet of trucks or attached to an existing building, the industry looks to TORO for Garage and Service Buildings at the lowest cost per square foot.

Storage and Warehousing

Benefits:

- Clear span capabilities
- Thermally efficient
- Fast and measurable ROI
- Attractive design and finish options to match existing property & buildings

For a fraction of the cost of wood, steel storage structures are easily the best value and the non-combustible materials make TORO buildings affordable to insure. TORO steel structures are the safest choice when your business depends on long term protection against mold, termites, rot and flood damage.

70x120

30x80

40x60

60x120

100x160

140x80

Commercial and Retail

36x36

Benefits:

- Reduces architect and design costs
- Guaranteed to meet or exceed building code requirements
- Efficient and expedient occupancy/operation to maximize ROI
- Controlled budget and timeline

The TORO name is behind many commercial developments including manufacturing facilities, distribution centers, utility stations, transportation depots, etc. as well as retail venues across the country and abroad.

100x80

75x250

80x120

60x120

Hangars and Aviation

80x88

Benefits:

- Design flexibility with high ceilings, unlimited length and column-free widths up to 200 feet
- Fast, easy construction
- Low maintenance
- Energy efficient

TORO engineers aircraft hangars to meet aviation specific requirements and the most complex project details.

100x80

220x110

Arenas and Agriculture

60x150

Benefits:

- Permits the largest open clear span interior
- Easily insulated for year-round animal comfort
- Design versatility for lofts and upper storage
- Smart investment to protect tools

TORO steel buildings have always been a popular choice for large arenas and many agricultural applications due to their comparatively low construction cost and lower maintenance requirements.

150x240

Classic Mini Building Kits

Benefits:

- Practical, compact sizes for smaller spaces and budgets
- Pre-kitted for quick and convenient turnaround
- Long term durability, security and full guarantee
- Simple enough to erect in one day

TORO recognizes the need for building solutions of all sizes and offers the convenience of compact mini buildings.

Two-Door Classic Mini

Available in:

20W x 24L

Complete with:

- 26-gauge color roof and wall panel
- Engineer sealed drawings
- Two 8' x 8' framed openings
- Man-door

**Garages, Storage,
Equipment, Maintenance**

One-Door Classic Mini

Available in:

25W x 30L

Complete with:

- 26-gauge color roof and wall panel
- Engineer sealed drawings
- 3:12 roof pitch
- Two 8' x 8' framed openings
- Man-door

**Utility Buildings, Garages,
Storage**

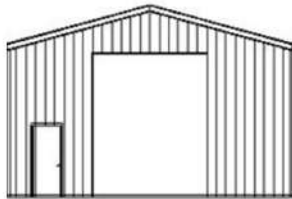

Frame Design

Clear-span frames are most often used in buildings where unobstructed interior space is required. There aren't any interior columns, which allows for the space required to store large items and machinery.

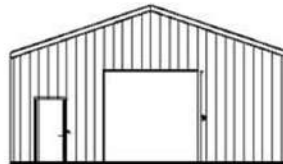

Width
15' to 200'

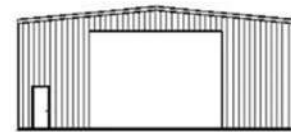

Height

Accessories & Options

Doors

TORO offers a complete line of commercial doors including pre-assembled steel man doors, steel curtain roll-up doors and self-storage doors in a wide variety of standard sizes, styles and colors. Custom products in special sizes, gauges and hardware configurations can also be supplied to meet specific project needs. Also available, Door Trim.

Windows

Thermally efficient windows are an attractive way to bring in natural light to reduce your lighting bills while adding aesthetic appeal to the exterior of your building. Self-flashing and self-framing aluminum windows are available with Thermal-Break or Non-Thermal Break frames. Thermal Break frame windows can be shipped pre-assembled in galvanealed sub-frame assemblies. Styles include Casement, Awning, Project-In, Horizontal Sliding, Single Hung and Fixed Picture in a variety of sizes. Also available, Window Trim.

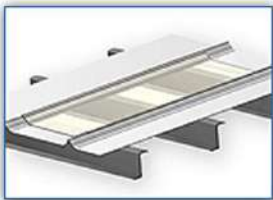

Louvers

Wall-mounted louvers provide ventilation to your facility while preventing dirt and debris from entering. 18 gauge frame units are 48" x 48" in a bronze finish with 20 gauge adjustable blades and come complete with bird screen.

Insulation

Your steel building will always benefit from an insulation system regardless of the intended use. TORO will assist you in choosing the correct R-value for your facility ensuring you a comfortable interior year-round as well as condensation control and maximized energy savings.

Translucent Light Transmitting Panels

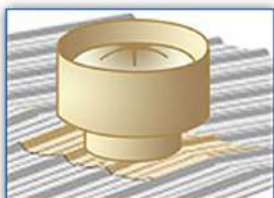

Fiberglass reinforced plastic panels allow natural light transmission and can reduce lighting costs.

Down Spouts and Gutters

Collects and transports precipitation safely away from the building.

Accessories & Options (cont.)

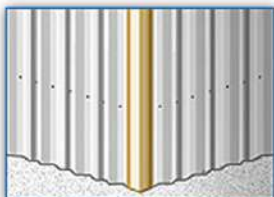

Monovent

20" circular gravity type ventilator unit, with damper.

Univent

26 gauge, 10' long x 9" throat gravity type roof ventilator unit comes in Polar White, with or without dampers and is designed for continuous runs.

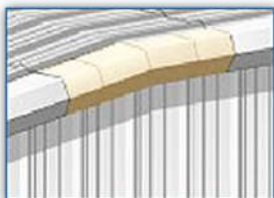

Corner Trim

Corner trim covers the joint between wall panels at the corner of a building.

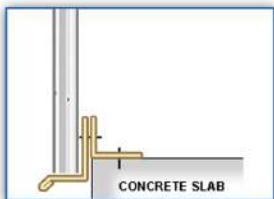

Eave Trim

Covers the joint between the sidewall panels and roof panels where they meet at the building eaves.

Gable Trim

A flashing designed to close the joint between the roof panels and endwall panels of a gable roof.

Base Trim

Closes off the lower edge of wall paneling.
